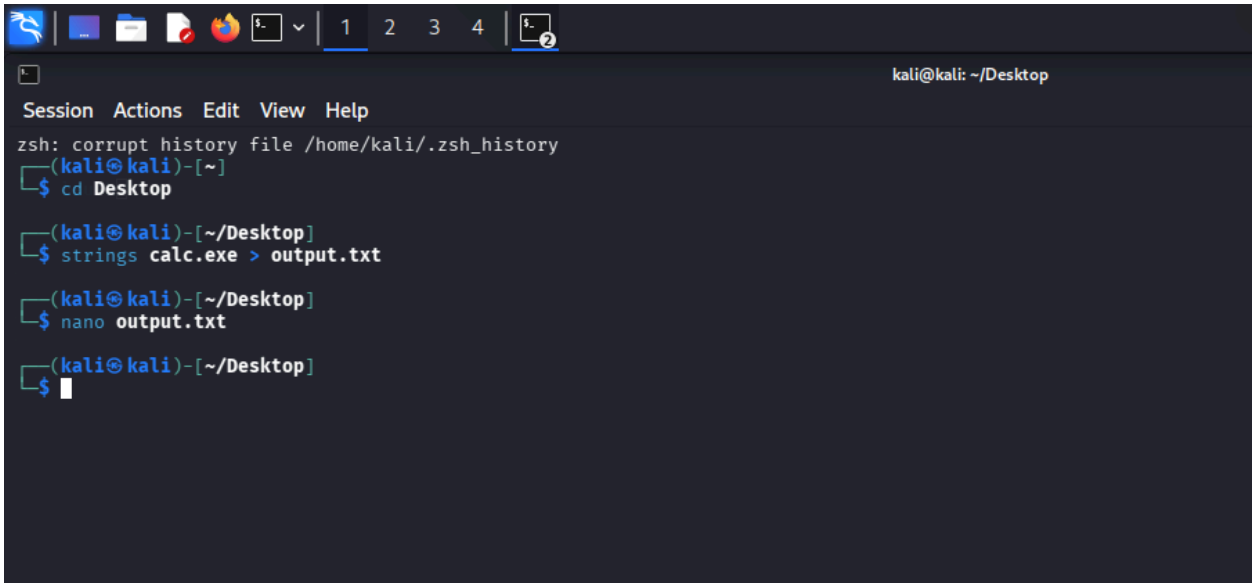
Malware Analysis Report

File: calc.exe



Static Analysis:

The strings command was used to extract readable text from the executable file.

Findings:
- The file references system libraries such as KERNEL32.dll and USER32.dll.
- Windows file paths such as C:\Windows\System32 were observed.
- These indicate that the program interacts with core operating system components.

Conclusion:
The file appears to be a standard Windows executable and does not show malicious behavior.
